

Pintail Technologies Positions for Growth

Pintail Opens New Office in Asia, Launches New Website and Corporate Logo, and Announces New Sales Teams in Germany and France

DALLAS (October 16, 2006) - Pintail Technologies, a breakthrough semiconductor test solutions provider, announced today that it has formed a Taiwan subsidiary company named 品特科技股份有限公司台灣分公司 with its office located at No. 164 5th Floor Jung Yung Rd. Hsin Chu City, Taiwan R.O.C. (新竹市中央路 164 號5樓). Pintail also recently added new sales teams in Germany and France for European sales support. In addition to these growth oriented milestones, Pintail is also announcing the launch of a new corporate logo and its' completely redesigned website.

"We are very excited about reinforcing Pintail Technologies' business presence in the Taiwan semiconductor community," said Scott Chang, Regional Manager for Taiwan and China and GM of Pintail Technology Taiwan Branch. "Our new Taiwan office will strengthen our local support efforts in the wake of increasing business from both fabless and IDM companies as well as the professional test service providers that support them."

"The Pintail business model centers around consistently delivering the benefits of lower test cost, improved reliability, better productivity, and enhanced yield performance to our customers," said Michael Geissel from eVision Systems GmbH in Munich, Germany.

"We think the Pintail team has a strong offering and a solid business model. We're happy to be representing their products in France and Italy," offered Jany Seigné from his office in Paris.

"The new Pintail logo and website are designed to help drive brand recognition and awareness as Pintail continues to help develop this emerging 'adaptive test' market," said David Parker, Pintail's marketing director. "We've redesigned our website to more effectively communicate the compelling nature of Pintail's real-time adaptive test and yield learning solutions."

"As a global provider of real-time semiconductor test software solutions, Pintail has worked hard to keep pace with rapidly expanding market conditions," said Taylor Scanlon, President and CEO of Pintail. "The Taiwan office, Pintail's new logo and website, as well as our new sales representatives in Germany and France are all critical components of a larger formula for success. We continue to be pleased about our software's proven ability to add real value and save money for the semiconductor test community."

About Pintail Technologies

Pintail Technologies is a semiconductor test improvement company that provides breakthrough software to reduce the cost of test and increase production output and quality through existing test equipment and programs. Pintail has created the first test improvement solutions to combine real-time test process control capabilities with innovative analytical programs in an integrated software suite designed for speed and accuracy. Fabless and integrated device manufacturers worldwide, in collaboration with leading assembly and test suppliers, use Pintail tools to improve the cost of test and increase both outgoing quality and productivity. More information on the company is available at www.pintail.com.
